DETAILED ACTION

This is a Notice of Allowance for application no. 09/707,521 in response to the RCE filed on March 13, 2006 wherein claims 1-37 are presented for examination.

Allowable Subject Matter

Claims 1-37 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly disclose a method, computer-readable medium, apparatus, or decoder for processing digital video data comprising preparsing, variable length decoding, and decompressing where preparsing and said decompressing are preformed according to time sharing criteria such that said decompressing is halted while performing said preparsing and such that said preparsing is halted while performing said decompressing.

The closest prior art ('Low-Power Video Encoder/Decoder Chip Set for Digital VCR's' by Hasegawa et al) discloses a similar method containing an unpacking process performed while the VLD is being performed (Page 1784 section D, Fig. 9). However, Hasegawa fails to particularly teach or suggest "parsing and said decompressing are performed according to time sharing criteria such that said decompressing is halted while performing said parsing and such that said parsing is halted while performing said decompressing" as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
